LANGUAGES

English, Hindi

RECENT PROJECT

Blindly Dating App - Android React Native

Blindly helps you connect with like minded people securely around you and form meaningful connections.

My Role: Setup backend and Infra, metabase, appsmith, moengage, Hasura etc

[Live Link](#) | [Github Link](#) | [Web Link](#)

ACHIEVEMENTS

- Co Founded [Blindly](#) (Codians-tech).

Blindly helps you connect with like minded people securely around you and form meaningful connections. Handling Tech and Building new features based on Users feedback.

Check more info on Product Hunt [here](#)

Tech Stack which we use: NodeJs, React Native, Postgres, Docker, Metabase, Hasura, Appsmith

- Founding Engineer at [Airtribe](#).

I was the first engineer at Airtribe. Built MVP and First phase of Cohort platform for Educators.

Built the app around April 2021 before joining Radius.

Built MVP frontend (VueJs), [Landing page](#) alone and worked with CTO (Dhaval) on backend.

Tech stack which I used to build MVP: Nodejs, VueJs (Nuxt), Postgres, DigitalOcean (Hosting)
